# Kathari Hima Kishore

**Software Engineer**

himakishorekathari@gmail.com | +91 8688339330

kathari-hima-kishore.tech | github.com/Kathari-Hima-Kishore

## Professional Summary

Detail-oriented B.Tech IT graduate specializing in **full-stack software development** with Python, JavaScript, and TypeScript. Proven ability to ship production software end to end – a browser extension at **250+ installs** across two app stores and an independently built 49-tool **MCP browser-automation server** with verified actions and modular architecture. Experienced across the complete development lifecycle: designing, coding, testing, deploying, and maintaining applications. Microsoft Certified: **Azure Fundamentals**..

## Skills

- **Frontend:** HTML, CSS, JavaScript, React.js, Spline
- **Backend:** Python, Node.js, SQL, Google Firebase, REST APIs
- **Cloud:** Microsoft Azure, AWS, Docker, Linux (Ubuntu), Git, GitHub Actions CI/CD

## Certifications

**Microsoft Certified: Azure Fundamentals (AZ-900)** Credential Link

- Issued by Microsoft, July 2026 – validates core Azure services, cloud architecture, and security/compliance fundamentals.

## Experience

**Microsoft AI Azure Intern** **May 2025 – Jun 2025**

*Edune Foundation (Microsoft Initiative via AICTE)* *Remote*

- Completed mentor-led training in **Microsoft Azure** fundamentals and **Azure AI Foundry** services (Vision & Language), collaborating with mentors and project stakeholders to deliver an end-to-end capstone.
- Engineered a capstone with a **Python** backend integrated to **Azure AI Foundry Vision Service** REST endpoints, writing and debugging service-integration code to analyze user-provided images.

**Python Development Intern** **Jul 2023 – Aug 2023**

*SpaceZee Technologies* *Remote*

- Engineered a **Python** web scraper using **BeautifulSoup**, aggregating data from 5+ online sources with an **HTML/CSS/JavaScript** dashboard, reducing manual data lookup time by **40%**.

## Projects

**Kruz – AI-Agent Browser Automation MCP Server** Link

- Built a 49-tool headed browser-automation **MCP server** in **TypeScript** (**Puppeteer**) that converts process definitions into verified, deterministic automated workflows – enabling AI agents to navigate, interact with, and extract data from live websites.
- Designed semantic element targeting with **human-in-the-loop handoff** (pause/resume/takeover for login, CAPTCHA, 2FA), handling dynamic pages and dialogs across real-world websites.

**Tab Wrapper (AI Browser Extension)** Link

- Built a **Manifest V3** cross-browser extension in **JavaScript** with a **Python/Flask REST API** backend deployed on Vercel; integrated the **Gemini API** using **prompt engineering** for AI-driven tab categorization.
- Shipped to **Chrome Web Store** and **Microsoft Edge Add-ons**, reaching **250+ installs**, with ongoing post-launch maintenance.

**Event Management System** Link

- Built a full-stack platform (**Python/Flask REST API**, **JavaScript** frontend) with **Firebase** Auth and **Firestore (NoSQL)**; implemented 3-tier **role-based access control** and automated deployment via **GitHub Actions CI/CD**.

## Education

**B.Tech in Information Technology** **Aug 2022 – Aug 2026**

*Hindustan Institute of Technology and Science* *CGPA: 8.98*
